RANCH HOUSE® DOORS

 | *Redefining the Entrance™*

We love sharing our story ...

Over 20 years ago our father, Mike Neal, started building custom wood doors in our garage in La Mirada, California. Those were the days, sawdust everywhere loud machines and some truly beautiful wood creations. He always used to say, "I love the smell of sawdust in the morning". Who would have thought that dad's "little experiment" would blossom into one of the nations leading door manufacturers. Although dad is no longer with us, we remain committed to his vision. Ranch House® Doors proudly produces door packages for the entire house. Garage doors, entry doors, interior doors, closet sliders, swing out garage doors, entry gates, pedestrian gates and even shutters - all with national distribution and a custom design team to help walk you through the process. Dad would be proud.

RHD6125

... and being a part of yours.

Dads vision has given us the distinct privilege of helping others make their homes warm and beautiful while not compromising details or function. We continue to live by the motto, "If you can think it we can build it". Ranch House® Doors remains committed to making your ideas come to life and are honored to have the opportunity to make your home truly unique.

Best regards -

The Neal Family
